# WRIGLEYS

## "AFTER EVERY MEAL"

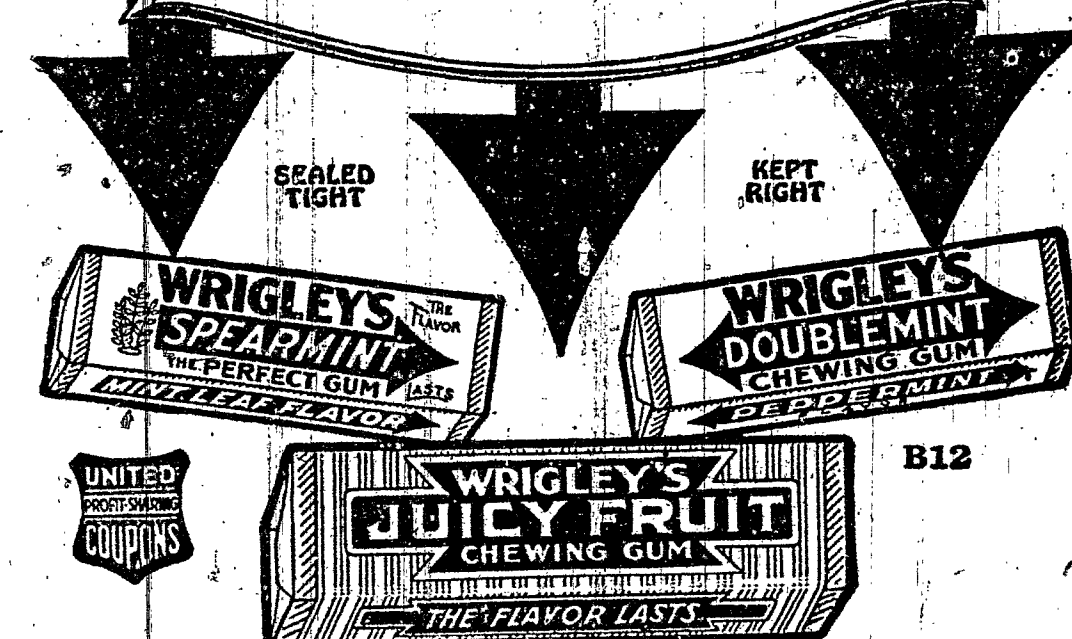

Mint leaf, peppermint or luscious juicy fruit, either flavor is a treat for your sweet tooth.

And all are equally good for you. Teeth, appetite and digestion all benefit.

Your nerves will say "thank you," your vim will respond.

WRIGLEY'S is liked for what it does as well as for its BIG value at the small cost of 5c.

The Flavor Lasts

## DIFFERENT IN THEIR MAKEUP

Boys Together, John Burroughs and Jay Gould were as Wide Apart as the Poles.

One poignant recollection John Burroughs had of Jay Gould as boy and man, he spoke of in this way: "I was large and strong, while Jay was small and slippery. A boy taught us to wrestle, but Jay would break his hold and land on top. I would say: 'Jay, that isn't fair,' but he would only laugh. Not wanting to be thrown, he resorted to tricks, and because I was indulgent, would wrestle with no one else. He went away to an academy and, when he returned, his father had sold his land and bought a village tin-shop. Jay got in with a man and made maps. By and by he left that part of the country and, our lives being no longer parallel, I never spoke to him after that, although I saw him twice.

"One day while I was custodian of a vault at the national treasury in Washington I heard a familiar voice. Looking up from my desk, I saw Jay Gould, dark and thin and wiry as ever, and even then one of the richest men in the United States. He hadn't served me, and I said nothing."

Othello had just pressed down the best sofa pillow over Desdemona's face.

"Any way," she said in smothered accents, "I shall not have to listen to your long-winded tales about what you did, and you acted—and anyway the handkerchief that stirred up all the trouble was real old point, and—"

But she had had the last word.—McCall's Magazine.

Quality and Equality.

From a dramatic review: "The play has one of the most evenly balanced casts we have ever seen—all rotten."—Boston Transcript.

## It's So Easy to Make the Change

There's no bother and no sacrifice in turning away from the ills which sometimes come from tea and coffee, when you decide on

## POSTUM CEREAL

Then you have a rich, full-bodied table beverage which fully satisfies the taste—and there's no ingredient to harm nerves or digestion.

Thousands have changed to Postum as the better meal-time drink and they don't turn back.

Suppose you try the change for ten days and note the result.

"There's a Reason" for Postum

## Daddy's Evening Fairy Tale

BY MARY GRAHAM BONNER

### CARRIER PIGEON'S HISTORY.

"I have a story I want to tell you," said Uncle Charlie.

"Carrier Pigeon to the other carrier pigeons."

"We'd like to hear the story," they all said most politely.

"It's really a bit of history," Uncle Charlie said.

"Oh," said the carrier pigeons, "we thought we were to have a half-holiday."

"Ah," said Uncle Charlie, "I do not think you will mind this sort of history. In the first place it is family history and that is interesting."

"Always to the family whose history is being given or told."

"Then you will not have to learn your lesson if you don't want to. You don't need to study. You don't need to do any work about it. You may just listen, if you want to."

"History like that will be pleasant," said one of the carrier pigeons, "although I really like history better than any other lesson anyway. It's rather fun to hear what others have done."

"Do go on, Uncle Charlie, and tell us the history."

"So Uncle Charlie Carrier Pigeon began."

"We have been carrying messages for hundreds and hundreds of years."

"Gracious," said one of the carrier pigeons, "I didn't know I was that old."

"Neither did I," said another.

"And neither did I," said a third.

"Ah, I do not mean that we, ourselves, have been carrying messages for that length of time," said Uncle Charlie.

"Ah," said the first carrier pigeon, who had spoken before, "I didn't imagine I could be that old."

"The same was true with me," said the second.

"I couldn't believe that I had been carrying messages for that length of time either," said the third.

"But our family have been doing this work for years and years and years," said Uncle Charlie.

"The art of carrying messages has been handed down from grandfathers and grandmothers to fathers and mothers and so on."

"One of our relations carried forty-thousand messages in one trip. And each message was about twenty words in length."

"Some of these messages were sent by means of tiny photographs, so tiny that they had to be read with the aid of a microscope or glass to make them look full-sized and so they could be seen easily."

"And our relative carried these little photographed messages. It was very wonderful."

"In that way we can carry more, too, without being so tired."

"Ah, carrier pigeons have always done a great work and it is a right pride we have to rejoice over the fine work which our relatives have done."

"But it is up to us to continue the good work, and I believe we always will."

"We always will for we always have, for hundreds and hundreds of years. Carrier pigeons have never disgraced the name of carrier pigeons and they have always gone on with the work which the others have left for them to do."

"It is the motto of the carrier pigeons—keep up the good work. And so while we haven't been carrying messages for hundreds and hundreds of years we are keeping up this task to carrying messages."

"That is what carrier pigeons have carried messages right down through the ages, and that they aren't going to stop now."

"True, true," said the other carrier pigeons. "We will always continue our work and will be glad we can do it."

"Fine spirit," said Uncle Charlie Carrier Pigeon, "but with such a history back of us, we cannot help but have this spirit."

Was His Son.

A man remarks, looking at a portrait, "Uncles and brothers have I none, but that man's father is my father's son." What relation is the original of the portrait to the speaker?—His son.

Goes With a Coach.

What is that which comes with the coach, goes with the coach, is of no use whatever to the coach, and yet the coach can't get along without it?—Noise.

Particular!

"What was the matter with that lady who just hurriedly left the store?" asked the grocer.

"She found fault with the potatoes," replied the clerk.

"What was the matter with the potatoes?"

"She didn't like the color of their eyes."

But it's a good thing.

It takes a good deal of time.

## POULTRY

### WIRE FOR FENCING POULTRY

Two-inch Mesh Is Most Commonly Used and Can Be Purchased at Moderate Price.

(Prepared by the United States Department of Agriculture.)

Wire netting, two-inch mesh, is commonly used for fencing poultry yards and can be bought at a moderate price.

Where several runs are adjoining, three-fourths of an inch or one-inch mesh wire should be used at the bottom to a height of two to two and one-half feet to keep the males from fighting one another.

The height of the fences should be regulated by the variety of fowls. The heaviest breeds, like the Brahmas, may be restrained by a four-foot fence, and

most of the other breeds can be kept in by a six-foot fence. Hamburgs and Leghorns may be kept in the yards by clipping the flight feathers on one wing. Gates should be provided in order to permit access from one yard to the next.

If convenient, it is well to have double yards, for then one may rotate green crops. The yards may be sown to oats, wheat, or rye, and while the fowls are using one yard the green feed in the other can be getting a fresh start.

When the yards are to be on only one side of the house, they should be on the south side in order that the fowls may have the benefit of the first dry ground in early spring. It is not infrequently happens that in localities where snow is abundant the ground on the south side is dry many days before that on the north side.

If the yards are to be in permanent sod and are to furnish green feed for the fowls, 70 to 80 square feet should be allowed for each bird. Poultry specialists in the United States Department of Agriculture say, "If part of the green feed is to be otherwise provided for, and the yards used mainly for exercise grounds, 35 to 40 square feet per bird will be sufficient."

Shade of some kind should be provided, and this can often be advantageously furnished by planting fruit trees (such as pears, plums, cherries, and apples) in the yard.

GRIT SUPPLY IS ESSENTIAL.

Material Takes Place of Teeth in Preparing Fowl's Food for Further Digestion.

Grit is essential to the health of fowls and to economy in feeding. Grit takes the place of teeth in preparing the feed for further digestion and is required for the proper preparation of feed in the gizzard. When the feed is not properly taken care of in this organ, an undue strain is thrown on the fowl's system, often resulting in disease and also allowing much of the nutriment to pass through the bird's body without being absorbed. In every pen or yard a box of grit should be kept. Recent investigators have asserted that grit is a part of the necessary feed of a flock, giving the fowls strong bones and a bright plumage.

Ordinarily, the hen does not consume enough lime to form the shells of eggs, if she is laying abundantly, unless something besides the ordinary grain feeds is accessible to her. Grit is also very good for this purpose. A box of crushed shells may be placed before the fowls, allowing them to eat at will. Old mortar and fine gravel are also useful in supplying lime, say poultry specialists of the United States Department of Agriculture.

Charcoal readily absorbs gases, impurities, and acids, and thus acts as a corrective when the stomach is sour and digestion has been impaired.

GEESSE UNLIKE OTHER FOWLS

Best Results Obtained by Mating in Pairs During Breeding Season—Partial to Mates.

For best results geese should be mated in pairs during the breeding season. At least not more than two geese should be allowed for one gander. Geese are unlike any other farm poultry and are partial to their mates. A gander ought not to be kept more than three or four years, as an old gander is not a good breeder. From the other hand, females are more prolific when they get older, and as a rule the eggs are more fertile. Females may be kept for eight or ten years or even longer.

Feeding Baby Chicks.

Young chicks should not be fed till 24 to 48 hours after hatching, and they will not suffer if given no feed until the third day.

Riches of Fertilizer.

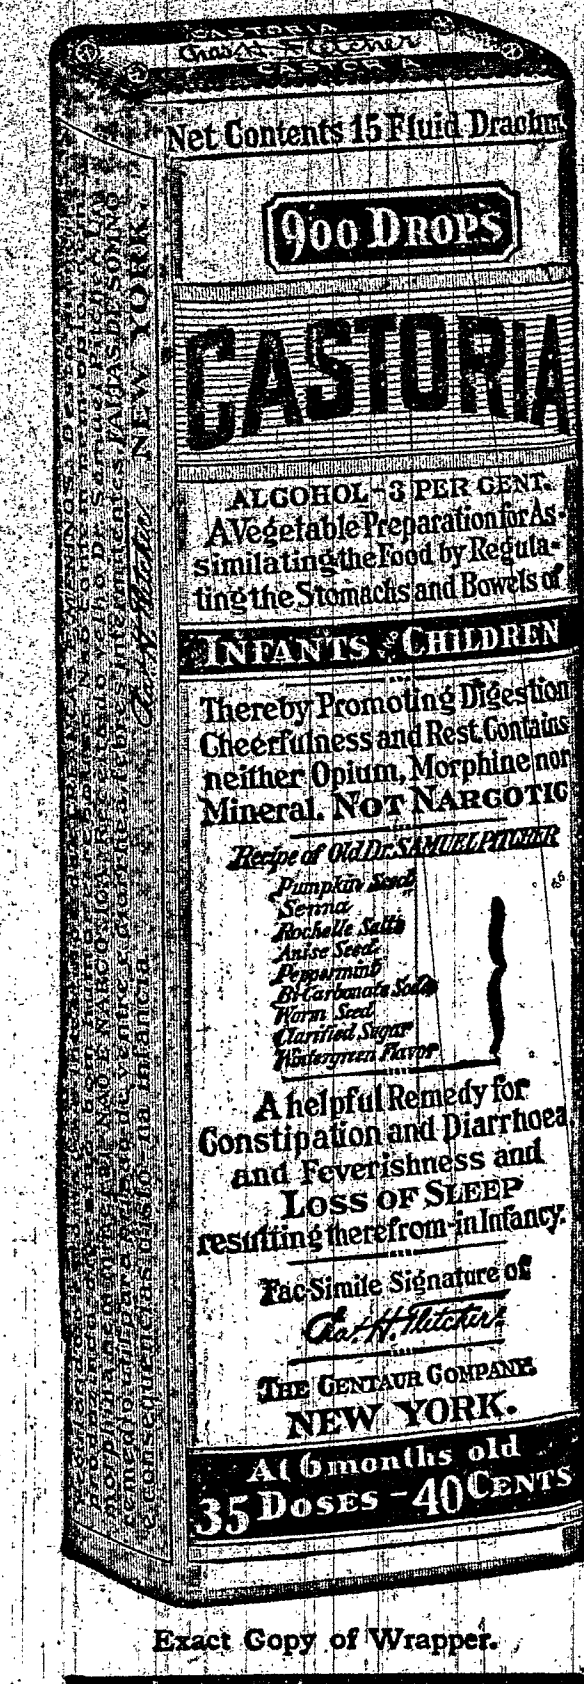

Manure is richer than hen droppings.

## Why Castoria?

YEARS ago Castor Oil, Paregoric, Drops, and Soothing Syrups were the remedies in common use for Infants and Children; Castor Oil so nauseating as to be almost impossible and the others all containing Opium in one form or another, but so disguised as to make them pleasant to the taste, yet really to stupefy the child and give the appearance of relief from pain.

It required years of research to find a purely vegetable combination that would take the place of these disagreeable, unpleasant and vicious remedies that from habit had become almost universal. This was the inception of, and the reason for, the introduction of Fletcher's Castoria, and for over 30 years it has proven its worth, received the praise of Physicians everywhere and become a household word among mothers.

A remedy ESPECIALLY prepared for Infants and Children and no mother would think of giving to her baby a remedy that she would use for herself, without consulting a physician.

## Children Cry For Fletcher's CASTORIA

### Have You Tried It?

Everybody has read the above headline; how many believe it? Have you a little one in the home, and has that dear little mite when its stomach was not just right felt the comforts that come with the use of Fletcher's Castoria? You have heard the cry of pain. Have you heard them cry for Fletcher's Castoria? Try it.

Just help baby out of its trouble tomorrow with a taste of Castoria. Watch the difference in the tone of the cry, the look in the eye, the wiggle in the tiny fingers. The transformation is complete—from pain to pleasure. Try it.

You'll find a wonderful lot of information about Baby in the booklet that is wrapped around every bottle of Fletcher's Castoria.

### GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher

THE CENTAUR COMPANY, NEW YORK CITY.

Immune. James—May I kiss you? Elleen—They say kissing tends to the propagation of microbes, then, I'm not afraid of them.—Carolina Tar Baby.

## ASPIRIN

Name "Bayer" on Genuine

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monacetylacetic acid, of Salicylic acid.—Adv.

That's All Right. By-laws proposed by the Seine departmental council, France, for street cars and omnibuses operating in the district, will compel men to give up their seats to elderly women or mothers with children.—Brooklyn Eagle.

### If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why the best of medicines that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promise of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited to those who are in need of it. A prominent druggist says: "Take for example, Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend for in almost every case it shows excellent results, as many of my customers testify. To other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills all the promises made in its name. It cures liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism. You may receive a sample bottle of Swamp-Root by mailing Postcard Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

Over the Top! These are hard times for the poor working girl! It is all she can do to make the ends of her socks meet the bottom of her skirt.—Castings Magazine.

## Spohn's Distemper Compound

Hoary Old Asia. The history of Asia goes back very far. One of the earliest events recorded and regarded as authentic is the founding of the temple of Bel at Nippur, 6000 B. C. The Aconitium-Summer kingdoms are placed at the head of the ruling powers. When they commenced is not clear but they continued to the year 2239 B. C.

If You Have a Pain. Vacher-Balm. Keep it handy, and avoid imitations.—Adv.

Probably Made Threats. He—"Did you have much trouble learning to sing?" She—"Yes; especially with the neighbors."

## Potash for Side Dressing

For side dressing cotton, corn and other Southern crops, 200 pounds Kainit, or 125 pounds 20 per cent Manure Salt, or 50 pounds of Muriate of Potash, furnish the same amount of Actual Potash which is so profitable in preventing cotton rust and in increasing the yield of cotton, corn and general crops.

These are the three Standard German Potash Salts that have been used for generations to great advantage in the South. Having planted the crop, one cannot afford to let it starve. A good side dressing may make all the difference between success and failure. Try it and you will find that

## POTASH PAYS

42 Broadway, New York City

## Find the Cause!

It isn't right to drag along feeling miserable—half sick. Find out what is making you feel so badly and try to correct it. Perhaps your kidneys are causing that throbbing headache or those sharp, stabbing pains. You may have morning sickness, too, headaches, dizzy spells and irregular kidney action. Use **Doan's Kidney Pills**. They have helped thousands of ailing folks. Ask your neighbor.

### An Alabama Case

Eugene Hobbs, pipe fitter, 14 E. Battle St., Talladega, Ala., says: "I had severe pains all through my back and limbs, caused by excessive uric acid in my blood. My kidneys were out of order and acted irregularly. My back was weak and lame and I could hardly bend or stoop at times. Doan's Kidney Pills made my kidneys strong and well."

Get Doan's at Any Store, or at

### A FEW GOOD SALADS.

There is no salad so well liked as a crisp green lettuce with a good high-seasoned salad dressing.

**Kidney Bean Salad.**—Cut one bunch of celery into small pieces, add one large onion, also cut fine, ten small sweet pickles cut in small pieces and one can of kidney beans. Serve with the following dressing:

One-half cupful each of vinegar and sugar, one egg beaten well, teaspoonful of mustard mixed with one-half teaspoonful of salt and a few dashes of cayenne; mix and cook together until thick.

**Banana Delight Salad.**—Take one-half pound box of marshmallows, one cupful of whipping cream, five bananas sliced and the marshmallows cut in quarters; a few tablespoonfuls of diced pineapple is an improvement and if the marshmallows are soaked for an hour in pineapple juice the flavor is greatly improved. This salad may be served on head lettuce garnished with a cherry.

**Egyptian Salad.**—Cut firm, ripe tomatoes in halves, having as many as there are people to serve. Remove the pulp and put into a mixing bowl with equal parts of chopped cabbage and one-half the amount of chopped celery. Season with salt, pepper and sugar. Mix the ingredients and fill the halves of the tomatoes, after mixing well with a good mayonnaise. Serve on lettuce.

**Pear Salad.**—Take halves of canned pears, arrange on head lettuce and garnish with balls of cream cheese, seasoned with chopped pimentos. Make a dressing of the pear juice, a good oil and a seasoning of vinegar, salt and pinch of sugar.

A salad which may be used on potato, lettuce, or in fact almost any salad mixture is Thousand Isle dressing, using any chopped vegetable in a mayonnaise dressing.

### SEASONABLE GOOD THINGS.

A small piece of round steak if put through the meat grinder will, when added to potatoes, make a good sustaining dish for three or four portions. To a cupful of the ground meat take four medium-sized potatoes, put them through the meat grinder with one small onion or with a portion of fresh green pepper, if the onion is not liked. Cook in a frying pan with a small piece of suet, or add a tablespoonful or two of beef fat to the hot frying pan and turn in the chopped potatoes; season well with salt and pepper, stir and cook until nearly done, then add the meat well seasoned and cover; cook until the potatoes seem well done. Brown on the bottom, turn and brown, then roll out on a hot platter like an omelet. Garnish with parsley. This dish is satisfying and attractive.

**Salmon Omelet.**—Beat six eggs thoroughly, add six tablespoonfuls of milk, mixed with one tablespoonful of flour, salt, pepper and onion, salt to taste. Have a half-pound can of salmon well flaked, with skin and bones removed. To this add twelve chopped, stuffed olives, salt, paprika and onion salt. Mix and turn into a well-buttered, hot omelet pan. Cook until well done underneath, then finish on the upper rack of the oven. Serve on a hot platter.

**Casseroles of Rice and Meat.**—Cook two-thirds of a cupful of rice with a teaspoonful of salt in three cupfuls of boiling water. Line an casserole or baking dish with the cooked rice. Take two or three cupfuls of ground meat seasoned to taste and softened with gravy. Fill the lined dish with the meat to an inch from the top and cover with a layer of rice. Bake in a moderate oven one-half hour. Serve hot.

**Waldorf Salad.**—Take one cupful of chopped nuts, two cupfuls of chopped apples, two cupfuls of celery cut in bits, one small onion, mix and serve on head lettuce after mixing with mayonnaise.

**Chocolate Bavarian Cream.**—Soak one-eighth of a box of gelatin in one-eighth cupful of cold water. Grate one-half ounce of chocolate; melt and add to gelatin one-half cupful of milk, three-eighths cupful of sugar; cook until smooth. Add when cool and thick one-half cupful of whipped cream. Pour into molds and chill. Flavor with vanilla and add a little salt.

**Nellie Maxwell**  
Eruptions of Kiluauea.  
The great eruptions from the volcano of Kiluauea, in the eastern part of the island of Hawaii, were those of 1783, 1823, 1882, 1840 and 1883. Kiluauea, a conical crater lying a mile north of the main crater, is now extinct.

## THIS WOMAN'S EXPERIENCE

### Brings a Ray of Hope to Childless Women

Lowell, Mass.—"I had anemia from the time I was sixteen years old and was very irregular. If I did any house cleaning or washing I would faint and have to be put to bed, my husband thinking every minute was my last. After reading your text-book for women I took Lydia E. Pinkham's Vegetable Compound and used the Sanative Wash, and have never felt better than I have the last two years. I can work, sleep, and feel as strong as can be. Doctors told me I could never have children—I was too weak—but after taking Vegetable Compound it strengthened me so I gave birth to an eight pound boy. I was well all the time, did all my work up to the last day, and had a natural birth. Everybody who knew me was surprised, and when they asked what made me strong I tell them it was Lydia E. Pinkham's Vegetable Compound and never felt better in my life. Use this testimonial at any time."—Mrs. ELIZABETH SMART, 142 W. Sixth St., Lowell, Mass. This experience of Mrs. Smart is surely a strong recommendation for Lydia E. Pinkham's Vegetable Compound. It is only one of a great many similar cases.

**Find an Ancient Temple.**  
Greek archaeologists have unearthed an imposing temple at Hieras, Thessaly. The structure is in an excellent state of preservation and is stated to be as large as the temple of Jupiter at Olympia. The bronze inscriptions establish the date at 400 B. C. Numerous tablets also have been found bearing indications of laws of ancient civilization. This is the second temple which has been discovered within a month, the first having been found near the city of Volvi. The work is continuing.

**Suitable Food and Care.**  
The chief essentials to the proper growth of chicks, according to the bulletin, are good coops or houses, cleanliness, proper feed and water, shade and free range. Growing chicks should be provided with large, roomy coops or houses, which will give them a comfortable place to stay at night and during stormy weather. The bulletin suggests no particular kind of house, but states it should be so built that it will provide the chicks with

## KEEP CHICKS IN BEST CONDITION

Young Fowls When Old Enough to Shift for Themselves Must Be Given Care.

### NEGLECT IS CAUSE OF LOSS

Bulletin Given Out by Department of Agriculture Especially for Beginners Gives Essentials for Proper Growth.

(Prepared by the United States Department of Agriculture.)

The enthusiasm with which many poultry raisers, particularly beginners, start in the spring with young chicks sometimes lags as the season advances and the chicks get old enough to shift for themselves. If care is neglected at this period, however, success is improbable. The baby chicks may be smart little fellows from strong, vigorous parent stock, and they may have been brooded carefully for the first two or three weeks, but unless they receive proper care and management during their later growing period they will not develop properly, and many of them will be lost by sickness and disease. This is the timely warning made by poultrymen of the United States Department of Agriculture in Farmers' Bulletin 1111, "Management of Growing Young Chickens," published by the department, in which is given the essentials to proper growth and development of chicks. The bulletin is written briefly and in simple terms for beginners, especially members of boys and girls' poultry clubs.

The chief essentials to the proper growth of chicks, according to the bulletin, are good coops or houses, cleanliness, proper feed and water, shade and free range. Growing chicks should be provided with large, roomy coops or houses, which will give them a comfortable place to stay at night and during stormy weather. The bulletin suggests no particular kind of house, but states it should be so built that it will provide the chicks with

Member of Boys' Poultry Club and His Flock.

plenty of light, pure air and sunshine, and protect them from dampness and storms of all kinds.

Chicks should never be crowded in brood coops for crowding will cause them to become overheated, resulting in improper growth and sometimes in dead chicks.

Sickness or disease usually starts in unclean quarters, and in such places lice and mites are always more plentiful, the bulletin says. The coops should be cleaned and sprayed once a week, and clean shavings, chaff, or sand put on the floor. Examine the chicks and houses often for lice and mites, and if found they should be gotten rid of at once. Farmers' Bulletin 1110 gives directions for fighting lice and mites.

### Feed Right for Rapid Growth.

The three kinds of feeds most necessary for rapid growth are grain feed, green feed and dry mash. A grain mixture should be fed night and morning, giving as large a quantity as the chicks will eat clean, but no more. A good mixture for growing chicks consists of three parts cracked corn, two parts wheat and two parts hulls of oats. Kafir corn or rolled or hulls barley may be substituted for hulls of oats. A supply of fresh green feed is almost as necessary as grain for growing chicks. They obtain plenty of it if they have free range, but if kept in confinement, lawn grass, beet tops, cabbage lettuce or other such green feed should be supplied regularly.

Grit and oyster shells should be provided so the chicks may help themselves whenever they wish. When sour milk can be obtained it should also be kept before the chicks, as no feed is regarded better for them. When this is given the amount of beef scrap in the dry mash may be reduced one-half. Plenty of fresh, clean water is absolutely necessary, and in hot weather it should be provided twice daily in dishes that have been thoroughly cleaned.

The bulletin emphasizes the importance of free range and shade for growing chicks. They are necessary if chicks are to grow rapidly and develop into vigorous fowls. When growing chicks have free range they obtain quantities of green feed, bugs, worms and other things, therefore they require less grain and are less liable to sickness and disease.

### STARTING HORSES IN SPRING

Watch Necks and Shoulders Carefully and Wash With Salt and Water in Remedy Cells.

Keep Incubator Clean.  
After each incubator hatch come off, the interior of the machine should be cleaned most thoroughly. Sprinkle it out well and then spray it with a good disinfectant.

Utilizes Idle Land.  
The home garden utilizes idle land and makes time for food production.

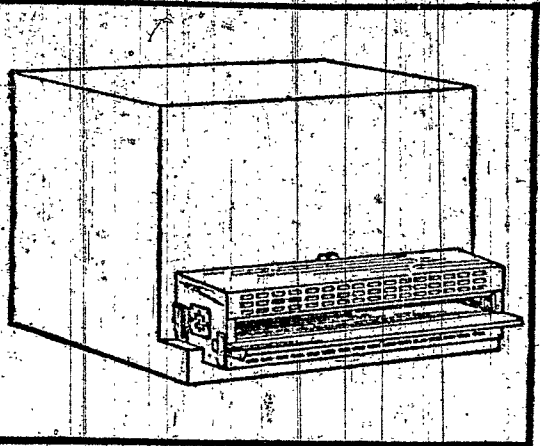

## KILL OUT DODDER SEED

During the first season of infestation in clover or alfalfa, dodder usually occurs in small scattered areas. Such infested areas should be either mowed and removed before the dodder matures seed or else burned in the field. If seed has formed, burning is the only remedy, since it kills not only the plants but also the seeds of dodder which may be lying on the soil surface.

### AUTOMATIC TRAP ON BEEHIVE

Primary Object of Invention is to Prevent Bees From Leaving in Large Numbers.

The scientific American in describing an automatic beehive trap, the invention of Dr. S. Rowe of Marseilles, Ill., says: "The invention relates more particularly to an automatic bee trap. The primary object is to provide means whereby the entrance and exit openings of a beehive may be automatically closed by the weight of the occupants to prevent the bees from leaving."

A Perspective View of a Hive, With Invention Attached.

ing the hive in large numbers, which is commonly known as 'swarming.' It is a further object to provide a means by which the ordinary passage of the bees in their performance of gathering honey is unobstructed.

### WHITE ANTS INJURE TIMBERS

Insects Enter Wood Wherever It Comes in Contact With Damp Earth and Eat Into Beams.

Winged white ants are often observed flying about houses in spring, and are sometimes supposed to have come in from outside. The bureau of entomology of the United States Department of Agriculture explains that these winged insects really are hatched inside the buildings, and usually are to be taken, as indicating nests of wingless white ants working destruction in the timbers.

These insects, which really are not properly ants, enter the wood wherever it comes in contact with damp earth, and often eat into the center of an upright beam without manifesting their presence on the outside until the wood is entirely ruined, and possibly a settling and cracking of the building has resulted.

The department urges that buildings be constructed with such foundations that no wood touches the ground, or if it is necessary to use wood, that it be impregnated with tar creosote. Concrete floors should be laid on a gravel base to prevent dampness and cracking, and where cracks occur they should be promptly filled.

### UNIFORM PRODUCTS FAVORED

Find Better Market, Bring Higher Prices and Are Handled at Less Expense Than Others.

Without uniform standards for farm produce there is no recognized basis for the business of buying and selling, says the bureau of markets, United States Department of Agriculture. Standardization of products, gives seller and purchaser a common language and a set quality upon which prices may be compared and fixed. Experience has shown that the products which are sold by grade and a better market, bring better prices, and can be handled at less expense than those sold without reference to standards. Standards have already been fixed for many farm commodities, such as American Upland cotton, shelled corn, wheat, oats, and for small fruit containers. These Federal standards apply only when the product is intended for interstate or foreign commerce. It is highly important to secure state cooperation so that the provisions that apply to a few products will apply to all that are offered for sale.

### DIARY OF MUCH IMPORTANCE

Adapted to Cost-Accounting Records When Information Wanted on Few Enterprises.

A diary is well adapted to cost-accounting records when information is wanted on only a few farm enterprises, says specialists of the United States Department of Agriculture. If the diary is written up each day it takes but a moment to enter the hours and minutes spent in working the crop, and the necessary notes regarding the cost of seed, fertilizer, and equipment. The common form of diary is a book containing a blank page for each day's record and with space in the back for financial accounts. Another form has a page for each day divided to give space to the records of two years. A similar type furnishes space for a five-year period.

## Gives Tanlac Credit For Splendid Health

T. J. PARKER  
4246 Juneau Street, Seattle, Wash.

"I used to think all the Tanlac testimonials were exaggerated, but I have felt thankful a thousand times I ever believed in it strong enough to give the medicine a trial," said T. J. Parker, well-known salesman for Gately's Clothing Store, residing at 4246 Juneau St., Seattle, Wash. "Several years ago I commenced having periodic spells of sickness and a few months ago I had an attack that I thought would finish me. When I finally got up, I was scarcely able to go. I had no appetite and what little I forced myself to eat caused so much gas on my stomach I could hardly get my breath. "At night I was often so bloated I couldn't breathe while lying down and just had to sit up and struggle for air. At times I had cramps so bad I could hardly endure it. "All the men at the store know Tanlac put me back on my feet, and I am glad to give this statement for what it may be worth to others." Tanlac is sold by leading druggists everywhere.—Adv.

## WINTERSMITH'S CHILL TONIC

# THE SEA COAST ECHO.

C. G. Moreau, Editor and Publisher.

Official Journal of the Board of Supervisors, Hancock County, Miss.  
Official Journal of Board of Mayor and Aldermen, Bay St. Louis, Miss.

## CITY ECHOES.

Today's Echo six pages.

What is "The Great Question?"

Closing out at cost our entire line of cream serge and fancy pleated skirts—The Specialty Store.

Mr. August Schiro, the progressive and wide-awake proprietor of the Boston Shoe Store, was a business visitor to New Orleans Tuesday.

Doc's Pets from New Orleans engaged the Bunker Hill Stars last Sunday in a baseball game that gave the Stars another victory to their long list of successes this season. Quite a large crowd viewed the contest.

Mon. H. S. Weston left Tuesday morning for Jackson to attend the monthly meeting of the Board of Directors of the Lamar Life Insurance Company, of which he is president.

St. Stanislaus baseball team defeated the Pass Christian nine Thursday afternoon on the local diamond. Eleven innings were played. Score 13-0. The funeral was held the same afternoon.

Miss Rita Breath, the attractive and accomplished young daughter of Mr. and Mrs. C. A. Breath, went down to New Orleans Tuesday morning, in which city she will spend the next several weeks with friends in that city.

The Tea Room, adjoining the A. & G. Movie Theatre, announces daily dinner from 12:00 to 1:30 P. M., for family use. Home-made pickles, preserves, pies, etc. Ice cream and home-made cones. Telephone No. 24.

Mrs. L. H. Fairchild, and interesting little daughter, Miss Christine, have arrived from Goodman, Miss., where they spent the winter with relatives and have reopened their home on the beach front and Nicholson avenue for the summer.

Mr. Leonard K. Nicholson, one of the directors of the New Orleans Times-Picayune, accompanied by his accomplished wife are spending the summer with Mrs. Fairchild on the beach front.

Mr. George W. Cuevas, merchant prince of Fenton, was a business visitor to Bay St. Louis Thursday, guest at the home of his brother-in-law, Dr. A. A. Kergosien, and family.

Mr. A. Lapeyre and family are looked for daily from New Orleans at their beach home, and it is interesting to note it is Mr. Lapeyre's intention to reside here permanently in future as in former years.

With the advent of June, it is noted the number of excursionists carried and on the Coast by the L. & N. Sunday service is increasing. Last Sunday there were 1,115 tickets sold and the excursion train was run in two sections.

An interesting communication addressed to the citizens of Bay St. Louis, and signed by H. D. Shaw, civil engineer, concerning the proposed waterworks plant, appears in this issue of The Echo. It answers many questions and explains the proposition.

Mr. and Mrs. James Munton, residing at their model farm on Jordan river, will celebrate their golden wedding anniversary on the 17th of next month, and for the occasion they will entertain a large party of relatives and friends from as far west as San Francisco, California, and from the East Florida Coast.

A force of carpenters and painters and others have been busy the past several weeks getting the Lanauk villa on the beach front in readiness for immediate occupancy by its owners. This will be the first time in quite a number of years the Lanauk summer home will be occupied, and it is pleasant to note the return of its owners.

Mrs. R. W. Webb and Misses Miriam and Levia Engman, accompanied by Mr. Engman, attended the social functions incident to the annual meeting of the Mississippi Travelers' Association, which was held in Biloxi during the latter part of last week. Biloxi, as usual, did herself proud for the occasion and the convention was a success in every particular.

Mr. Joseph F. Cazeneuve, vice-president of the Hancock County Bank after an absence of two months spent in New Orleans, has returned to Bay St. Louis, and is again meeting his many friends at his office and at his home. Mr. Cazeneuve has been under treatment of which The Echo is glad to state, and is now feeling better and more appreciably benefited by the course.

In order to take care of the increased patronage, the Bay Drug Company has added to its clerical force and now has a cashier, Mrs. Louis Hutter filling the latter place most acceptably, and where her friends will be glad to see her. President Firsching of the Company and Manager Cowan have a number of improvements and innovations for the business which they are gradually putting in, and as the expansion of the business will justify.

Mr. Thos. P. Hale has a force of workmen at work on the beach front of his property constructing a sea wall of concrete piling. Mr. Hale has evolved a plan that is calculated to serve a purpose to advantage where there is no bluff but where the water is almost on a level with the street. This bulwark will be covered with sand in sloping form and "sand-catchers" extending from the wall out into the water will be constructed. This will mean the restoration of a permanent roadway.

The Echo took occasion last week to dwell in these columns on the subject of patronizing home industries in the matter of printing and having it done at home. In this connection speaking of patronizing home concerns, it is refreshing to note our young business friend, C. G. McDonald is filling the orders for all material used in the printing of buildings, private and business, in course of construction. The latest in the matter of the fire-proof garage building for Messrs. Edwards Bros., opposite postoffice building. The brick, frame, gravel, etc., are being furnished from the Bay St. Louis firm of McDonald & Bros. This is a very encouraging sign.

Dr. and Mrs. B. C. Rush spent Tuesday at Long Beach, visiting the former's parents, Mr. and Mrs. D. M. Rush.

Mr. and Mrs. A. L. Stokoe were over from Gulfport during the week mingling with the friends of their former home town.

Mrs. E. W. Drackett was taken to New Orleans this afternoon to undergo an operation for appendicitis.

Dr. Amedee Mary, well-known New Orleans resident, has purchased the R. F. Foy residence in Waveland, and will summer there accompanied by his family.

Miss Carmelite and Mercedes Spotorno have gone to Nashville, Tenn., where Miss Carmelite is attending the Peabody Normal for the summer.

Mr. D. de Montuzin was called to New Orleans Thursday by a message announcing the critical illness of her brother-in-law, Mr. Estopino, who is at Hotel Dieu in a precarious condition.

The amount of building in progress around Bay St. Louis is an encouraging sign, and an indication that is reassuring. We understand there are quite a number of new dwellings planned for building during the present year.

Contractor A. B. Day is making splendid progress in the building of the handsome bungalow which he is constructing for Mr. Terrell Perkins on the beach front. When completed, this will add to the number of our city. Mr. and Mrs. Perkins will occupy the dwelling.

Miss Virginia Henry, accomplished daughter of Col. R. H. Henry of the Jackson, (Miss.) Clarion-Ledger, summering at the family summer home on the beach front near Gulfport, spent Wednesday in Bay St. Louis, the guest of Mrs. C. G. Moreau.

Mr. and Mrs. George R. Reg returned home from New Orleans Thursday night, to which city they accompanied Mr. Reg's sister, Miss Decima, on her way home to Wesson, Miss., after a visit here of a few weeks.

Dr. Cassius A. Peacock, whose family have been spending the winter in Washington street, reached Bay St. Louis a few days since to join and his family, and will spend a while in recreation before returning home.

Mr. Edwin W. Edwards, Mrs. Edwards and the children have returned to their home in Gulfport, after spending a while here under the parental roof in Washington street, leaving here with much regret and regretted by many friends who helped to make the visitors stay so pleasant.

Misses Amanda Chamberlain, of California, and Virginia Penner, attractive and accomplished young ladies of the younger set, have returned to New Orleans, after a delightful stay of a while, guests of Miss Jean Horton. Several informal affairs were given in compliment to the visitors.

Mrs. G. Y. Blaize, who left here recently to attend the National Convention of the Lady Foresters' Association as the representative from Mississippi, is visiting friends in Chicago. Tidings from Mrs. Blaize tell of the interesting and enjoyable time she is having in the big city on Lake Michigan. She will remain for an indefinite period.

The beautiful Rexach property purchased from Jesse Reed by Mr. Ernest J. Leonard for the proposed Bay St. Louis Hospital has been purchased through the Lucas agency by A. Batistella, of this city, the sale taking place Monday. With the plan for a local hospital abandoned, the property reverted to Mr. Leonard, who had purchased it for the purpose.

Mrs. Florence B. Steffe, of New Orleans, has purchased the Victor Coyachevich property in Julia street at public sale Monday, and will thoroughly remodel it. Mrs. Steffe is the recent purchaser of other property in Julia street which has been remodeled and improved to such an extent as to attract more than ordinary notice, thus adding value to realty in that part of the city.

Mr. Peter Tudury, one of the star fishermen of this section, when not engaged in his arduous duties as assistant cashier of the Hancock County Bank, hooled a blue fish the other day, the first of its kind known to have ever been caught in local waters. The fish was over a foot long and in every way a fine specimen.

Mr. Owen Crawford, resident representative for the Louisville & Nashville Railroad Company, as one of the superintendents of the local division, (bridge department), will leave within the next ten days for an extensive visit to California, including Los Angeles, San Francisco and intermediate points. During his absence Mrs. Crawford will visit relatives at Nashville, Tenn.

Mr. Rembert Rae, of the Merchants Bank, is away on a business trip to Dallas and will visit relatives at other points in Texas before his return home. Although here only a comparative short time, Mr. Rae has formed a wide circle of friends and his return home will be anticipated at the home of his parents, Mr. and Mrs. John A. Green, have returned to their home in New Orleans.

What is "The Great Question?"

There will be revival meeting at the First Baptist church of this city beginning Sunday, June 12th at 11 o'clock a. m., under the direction of Rev. J. S. Johnson, pastor. He will be assisted by Rev. W. A. McComb, of Baton Rouge, La. The musical and singing program will be under the direction of E. R. Denny, evangelist singer, of New Orleans. Evening services will begin at 7:45 o'clock. Public is cordially invited to attend and special invitation is extended to the young people to attend and take part in the singing.

Mr. J. J. McGraw, of Yazoo county, after a visit to his son-in-law and daughter, Dr. and Mrs. B. C. Rush, returned to his home at Vaughan, during the early part of the week. Mr. McGraw was recently elected fire warden of his county. We understand one of the first bills he will introduce at the next session will be to have a fire warden elected by the people at large, instead of by the board of supervisors.

Mrs. R. Westworth and children of Hattiesburg, reached here during the week, called by a message announcing the critical illness of Mrs. Westworth's mother, Mrs. Thos. Conway, who was the victim of a stroke of paralysis.

A force of workmen have started work on the Edwards' Bros. garage building, opposite the postoffice, Main street. The building will be fireproof and when finished, one of the substantial and handsome business buildings of the city. It will occupy the full size of the lot, save a few feet depth along the front, as to permit the building of a wider sidewalk. The entire structure will be of brick, the front of tapestry brick and great sheets of plate glass, stucco trimmings. Messrs. Edwards Bros. are their own builders, George Gilly, of Gulfport, supervising contractor. Every subcontract has been let to home people. Messrs. Edwards Brothers are to be commended for their enterprise and success.

Mr. Eugene Hays McGuire, of Yazoo City, connected with the news staff of the Jackson Daily Clarion-Ledger, and his charming and accomplished bride, before her marriage Miss Nina Hays, a Jackson, who were married at Yazoo City Monday arrived in Bay St. Louis the following day on their "honeymoon" and were guests for the week of Mr. and Mrs. C. G. Moreau. Mr. McGuire is the son of Mr. John G. McGuire, one of the best known and prominent newspaper men of Mississippi. He is a university graduate and a young man well traveled. During the war he crossed the ocean twenty times, and his services distinguished him in many instances. Needless to say the young people enjoyed their first trip to Bay St. Louis immensely, and before leaving expressed their appreciation of the many courtesies shown them by the good people who met and helped to entertain them.

## Unsealed Proposals

By MARTHA M. WILLIAMS

(Copyright 1930, by McClure Newspaper Syndicate)

"Mamma—let me see! You have a fine brow, a straight nose, your mouth is rather decent, your chin—" Hisley began, examining his stepcousin Anne-Maria critically from beneath lifted fingers. She laughed softly before answering plaintively. "But, you see, Ansell, it so rarely is shut I'm sure to spoil the picture."

"You needn't—can't be much hard—ship to keep silent an hour or so," Hisley retorted. Anne-Maria made a face at him.

"Suppose you try it," she said. "Pose me, tell me exactly how long; then, in the language of today, go to it. A mighty fair proposition. Are you game?"

"Certainly," Ansell flung back. "In fact, you couldn't please me better. A tall, model spoils inspiration," as he spoke, flourishing an old sheathed sword and a tattered battle-axe. "You know all about this, don't you?"

"Try to put yourself in the spirit of those who used to fill your soul with the joy of victory—I'll do the rest."

Risley, you see, had temperament. Anne-Maria translated it conceit. He had come to Hillover, the Eton place, a tanned shadow of himself, a month back, from a journey around the world.

It was thus he had elected to come home, after service abroad. At first he had been too weary for anything but sleep, food and rest. Together they had brought him back to himself. Indeed, to a self raised to about the nth power in his sense of his deservings. The deservings included Anne-Maria—she was lively, healthy, reasonably good-tempered. Besides, she would be rich when she came to twenty-one. Only a year ahead. Her step-mother, his aunt, had exhorted him to make sure of her before that time. She had planned the marriage ever since she came into the family, seven years back. Even so early Ansell had shown temperamental—which is a slight drift upon the bank of Fate for substantial endowment.

He was working upon a picture for a prize competition—not that he cared for the money; what was a mere thousand dollars? but the acclaim of winning would be worth while, withal, as a slight increase to his swollen vanity.

He had already washed in his back-ground, lately Hillover commanded a noble prospect, full of enchanting distances with a tree, lightning-scathed, a winding, narrow stream, tall gray bluff, in the foreground, clear grass at the bluff foot would serve admirably for the standing figure, leaning lightly upon the sword, and gently flinging the tattered flag.

He had hoped for another model—Mademoiselle Yvonne, the exotic, brought back by Susan Glover of the Red Cross service to help civilize this crass America, had failed him at the last minute. What she lacked of equaling him in temperament she more than made up in thrift. When artists Susan had let her know that Ansell had chosen her, Anne-Maria and working for a living she had instantly decided to waste no more time than smiles on him.

Hence his capricious humor. Of course he had not been seriously thinking of the French girl—but she had a way so taking she had gone rather to his head. When he had posed her substitute to his mind, Anne-Maria said suddenly: "There must be a forfeit—what's to gain or lose by speaking out of time?"

"Oh, anything," Ansell said, almost tremulously. "Whatever you like, if only you'll be quiet now—" busying himself with his palette as he spoke. "Of course if I need to mention small changes on account of changing light—that is not to count."

She nodded comprehension, the ghost of an English smile playing about her lips. "Look serious, inspired—if you can," he cried, noting it. Again she nodded, but banished the smile to her eyes. In its place there shone from her countenance a sweet, sunny peace—she had been the least bit hurried these last ten days.

She loved her stepmother fairly well—moreover the habit of obedience was strong in her. And mamma had all but said outright she could not die happy without seeing Anne-Maria safely settled in life—also that unless she married Ansell the shock of disappointment and grief would surely bring on a heart strain fatal to Ansell's aunt.

A year earlier that would have clutched matters—Anne-Maria would have gone, in a limo, to the matrimonial slaughter. But Jim Risdale had suddenly dawned on the horizon. That complicated matters. Jim was massive.

line to the point of saturation, chivalrous, humble before womanhood, and of a fine merry humor more than engaging. He would have courted Anne-Maria right off the reel if mamma had not intervened, telling him her stepdaughter was betrothed to the wandering soldier-artist—had loved him for years and would never love anybody else.

Therefore the good lady had brought Jim to be kind to Anne-Maria and kinder to himself, by keeping all thought of loving her out of his mind. See the complication? It was quite beyond poor Jim to think an elderly Christian lady could lie—even for the accomplishment of her own darling purpose.

He had accepted the role of brotherly friend with what grace he might—to the sorrowful bewilderment of Anne-Maria—who recognized in him "the male of her species," but dared not admit it even to herself.

She started over so slightly when half an hour later Jim came up the hill, calling a gay greeting to them. Ansell waved him away imperiously, then, finding him stock-still and staring, burst out with a stamp, of the foot: "Go back! Don't you see we are not to be interrupted?"

"Jim, you've saved my life!" Anne-Maria cried joyously, holding out her left hand to him. The right was numb from clutching the sword.

"What's up?" Jim demanded, possessing himself of the other hand. "Is it a game or an endurance contest, or what?"

"I think it is the game of my salvation," Anne-Maria said under her breath. Ansell mused in between them, saying masterfully in between them, young person, I claim as my forfeit—this, taking her right hand forcibly from Jim's clasp.

"You spoke first!" she cried, snatching away her hand.

"I had to," Ansell retorted. Jim looked dazed. "There is—speaking and speaking," he began. "I have to do some of it—here and now. Madame Eton has asked me to stand brother to Miss Anne-Maria. As such, I call you to account. To my sure knowledge you are making love to the French woman, and all the while engaged—here."

"Who says it?" Anne-Maria demanded, her eyes shooting sparks. "The madame herself," Jim answered steadily.

"She is mistaken," Anne-Maria returned, her voice steely. "I am not engaged to Ansell Risley—what is more, I never shall be."

"H-m! Will unsealed proposals be considered?" Jim asked with twinkling eyes. She smiled at him, dropped her head upon his shoulder and murmured softly, holding up her lips: "You had better seal right here."

Jim needed no second prompting. Ansell rushed away scowling madly. Jim called after him tauntingly: "Better play safe hereafter. Both ends against the middle is too risky, even for a genius!"

## POULTRY

### GIVE BREEDERS FREE RANGE

Most Desirable for Production of Fertile Eggs Intended to Be Used in Incubator.

(Prepared by the United States Department of Agriculture.)

Hazards which sometimes accompany the incubation of eggs are largely avoidable. Fertile eggs from vigorous breeding stock are necessary in order to obtain good hatches.

Free range for the production of fertile eggs with vigorous germs, but all eggs produced from such hens should not be used for incubation. Eggs that are abnormally small and poorly shaped or those having thin or very poor shells should be eliminated. Dirty eggs or those badly soiled should not be used.

If it is found necessary to set slightly soiled eggs they may be cleaned by rubbing lightly with a damp cloth, care being taken not to rub off any more of the natural bloom than is necessary.

It is never advisable to use for hatching eggs that are more than two weeks old. In freezing weather eggs should be collected two or three times a day, so as to prevent their being chilled. Neither a hen nor an incubator will hatch strong chicks from eggs containing weak germs or from those which have not received proper care.

In preparing the nest for the sitting hen, put from three to four inches of damp earth or a piece of grass sod in the bottom of the nest before the nesting material is put in to provide moisture. When the hen becomes dusty with insect powder or sodium fluoride. In doing this hold the hen by the feet with the head down, working the powder well into the feathers. This should be repeated about the eighteenth day of incubation so as to be sure that there are no lice present when the chicks are hatched.

The hen should be moved at night from the regular laying nest into the nest where she is to set. The latter nest should be in some out-of-the-way place where the hen will not be disturbed. In order to make sure that the hen will continue to stay in the new nest, she should be started with one or two china nest eggs.

Incubators are operated in a great variety of places with success. Where only a few small machines are used, they are usually located in a room or cellar of the house. A single layer or incubator house should be provided if the incubator equipment is extensive or if many machines are used.

### ADVISABLE TO BUY MACHINE USED

With Best Success in Incubating Machine.

(Prepared by the United States Department of Agriculture.)

Special investigations to find how the various bird species aid in the control of the grasshopper are being carried on by the Bureau of Biological Survey, United States Department of Agriculture. In the western states, the grasshopper is particularly troublesome, so far as the farmer and the ranch owner are concerned. Specialists found that of 27 species of birds examined 25 were grasshopper eaters. In 10 of the species all of the individuals collected had given grasshoppers place on their menu. The birds having the best records were the lark sparrows, meadow larks, Franklin gulls, Arkansas kingbird, crow blackbird, and the common kingbird.

Probably there are not birds enough in the country to clean up a full strength invasion of grasshoppers such as the western farmers have come to dread. It is said, but the birds assist materially in the efforts made by man to control the pest.

Specialists say that poisoning campaigns are among the best weapons used against the grasshopper. From time to time reports are sent in saying that many birds have fallen victim to the poisoned mixtures placed for the insects. Such charges were associated with the grasshopper spraying campaign in New England, and with the laying of poisoned mashes for the insects. Such charges were associated with the grasshopper spraying campaign in New England, and with the laying of poisoned mashes for the insects.

It is said, are not harmed at all by the presence of poison placed for insects or vermin; the quail in California were not harmed by the baits that were set out to kill ground squirrels—though the campaign was a general one and was conducted with much intensity. In the Dakotas a few birds succumbed to the arsenic mashes placed for grasshoppers, but the number killed was so slight as to be of no consequence, it is said.

By killing stray cats and chasing off scavenging hunters the farmer can protect a party to a sort of defensive alliance with the birds, so that when their crops need protection against insect enemies he will have a squadron of aerial cavalry to help him repulse the raid, specialists say.

Incubators are operated in a great variety of places with success. Where only a few small machines are used, they are usually located in a room or cellar of the house. A single layer or incubator house should be provided if the incubator equipment is extensive or if many machines are used.

## POULTRY

### ADVISABLE TO BUY MACHINE USED

With Best Success in Incubating Machine.

(Prepared by the United States Department of Agriculture.)

Special investigations to find how the various bird species aid in the control of the grasshopper are being carried on by the Bureau of Biological Survey, United States Department of Agriculture. In the western states, the grasshopper is particularly troublesome, so far as the farmer and the ranch owner are concerned. Specialists found that of 27 species of birds examined 25 were grasshopper eaters. In 10 of the species all of the individuals collected had given grasshoppers place on their menu. The birds having the best records were the lark sparrows, meadow larks, Franklin gulls, Arkansas kingbird, crow blackbird, and the common kingbird.

Probably there are not birds enough in the country to clean up a full strength invasion of grasshoppers such as the western farmers have come to dread. It is said, but the birds assist materially in the efforts made by man to control the pest.

Specialists say that poisoning campaigns are among the best weapons used against the grasshopper. From time to time reports are sent in saying that many birds have fallen victim to the poisoned mixtures placed for the insects. Such charges were associated with the grasshopper spraying campaign in New England, and with the laying of poisoned mashes for the insects. Such charges were associated with the grasshopper spraying campaign in New England, and with the laying of poisoned mashes for the insects.

It is said, are not harmed at all by the presence of poison placed for insects or vermin; the quail in California were not harmed by the baits that were set out to kill ground squirrels—though the campaign was a general one and was conducted with much intensity. In the Dakotas a few birds succumbed to the arsenic mashes placed for grasshoppers, but the number killed was so slight as to be of no consequence, it is said.

By killing stray cats and chasing off scavenging hunters the farmer can protect a party to a sort of defensive alliance with the birds, so that when their crops need protection against insect enemies he will have a squadron of aerial cavalry to help him repulse the raid, specialists say.
